

## Feedback — Week 1 Quiz

[Help](#)

Thank you. Your submission for this quiz was received.

You submitted this quiz on **Wed 9 Jul 2014 12:10 PM CEST**. You got a score of **10.00** out of **10.00**.

### Question 1

Which of the following is a principle of analytic graphics?

Your Answer	Score	Explanation
<input type="radio"/> Make judicious use of color in your scatterplots		
<input type="radio"/> Show box plots (univariate summaries)		
<input type="radio"/> Only do what your tools allow you to do		
<input type="radio"/> Don't plot more than two variables at a time		
<input checked="" type="radio"/> Show multivariate data	✓ 1.00	
Total	1.00 / 1.00	

### Question 2

What is the role of exploratory graphs in data analysis?

Your Answer	Score	Explanation
<input checked="" type="radio"/> The goal is for personal understanding.	✓ 1.00	
<input type="radio"/> They are used in place of formal modeling.		
<input type="radio"/> Only a few are constructed.		
<input type="radio"/> Axes, legends, and other details are clean and exactly detailed.		
Total	1.00 /	

## Question 3

Which of the following is true about the base plotting system?

Your Answer	Score	Explanation
<input checked="" type="radio"/> Plots are created and annotated with separate functions	 1.00	Functions like 'plot' or 'hist' typically create the plot on the graphics device and functions like 'lines', 'text', or 'points' will annotate or add data to the plot.
<input type="radio"/> Plots are typically created with a single function call		
<input type="radio"/> The system is most useful for conditioning plots		
<input type="radio"/> Margins and spacings are adjusted automatically depending on the type of plot and the data		
Total	1.00 / 1.00	

## Question 4

Which of the following is an example of a valid graphics device in R?

Your Answer	Score	Explanation
<input type="radio"/> A file folder		
<input checked="" type="radio"/> A PNG file	 1.00	
<input type="radio"/> The keyboard		
<input type="radio"/> A Microsoft Word document		
Total	1.00 / 1.00	

## Question 5

Which of the following is an example of a vector graphics device in R?

Your Answer	Score	Explanation
<input type="radio"/> GIF		
<input type="radio"/> JPEG		
<input type="radio"/> TIFF		
<input checked="" type="radio"/> Postscript	✓ 1.00	
Total	1.00 / 1.00	

## Question 6

Bitmapped file formats can be most useful for

Your Answer	Score	Explanation
<input type="radio"/> Plots that are not scaled to a specific resolution		
<input type="radio"/> Plots that may need to be resized		
<input checked="" type="radio"/> Scatterplots with many many points	✓ 1.00	
<input type="radio"/> Plots that require animation or interactivity		
Total	1.00 / 1.00	

## Question 7

Which of the following functions is typically used to add elements to a plot in the base graphics system?

Your Answer	Score	Explanation
<input type="radio"/> hist()		

☒ text() ✓ 1.00

☐ boxplot()

☐ plot()

Total 1.00 / 1.00

## Question 8

Which function opens the screen graphics device on Windows?

Your Answer	Score	Explanation
-------------	-------	-------------

☐ postscript()

☒ windows() ✓ 1.00

☐ jpeg()

☐ xfig()

Total 1.00 / 1.00

## Question 9

What does the 'pch' option to par() control?

Your Answer	Score	Explanation
-------------	-------	-------------

☐ the line width in the base graphics system

☐ the orientation of the axis labels on the plot

☒ the plotting symbol/character in the base graphics system ✓ 1.00

☐ the size of the plotting symbol in a scatterplot

Total 1.00 / 1.00

## Question 10

If I want to save a plot to a PDF file, which of the following is a correct way of doing that?

Your Answer	Score	Explanation
<input type="radio"/> Open the screen device with <code>quartz()</code> , construct the plot, and then close the device with <code>dev.off()</code> .		
<input checked="" type="radio"/> Construct the plot on the screen device and then copy it to a PDF file with <code>dev.copy2pdf()</code>	✓ 1.00	
<input type="radio"/> Open the PostScript device with <code>postscript()</code> , construct the plot, then close the device with <code>dev.off()</code> .		
<input type="radio"/> Construct the plot on the PNG device with <code>png()</code> , then copy it to a PDF with <code>dev.copy2pdf()</code> .		
Total	1.00 / 1.00
